

Internet/Intranet Middleware Server

The Performance Systems International (PSI) Internet/Intranet Middleware Server (IMS) is more than just a SUMMIT interface. The IMS is a complete solution for building Internet and Intranet applications.

Multiple SUMMIT Interfaces

The IMS provides multiple interfaces to SUMMIT. This allows you to take advantage of existing technology, and accommodate future platforms and interfaces.

Third-Party Integration

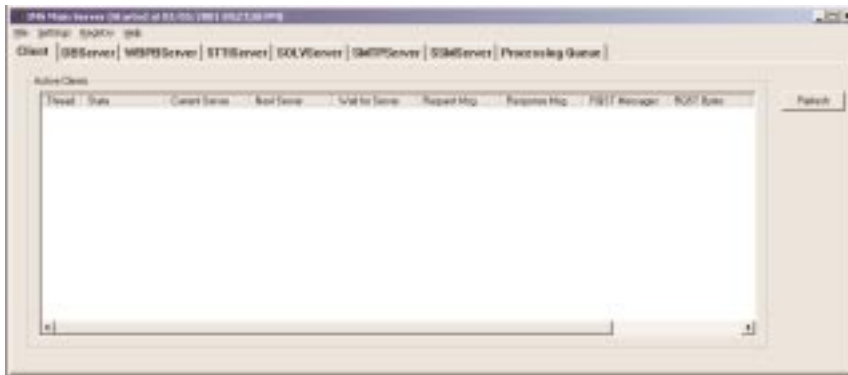

Do you need to integrate a third-party application into your Internet solution? The IMS provides an ideal framework for third-party integration.

Custom Transactions

With the optional Custom Transaction Framework, you are able to define your own XML messages, and write scripts (which can later be compiled) that control interaction with the SUMMIT system, the SQL database, or SOLV (an ODBC connection to the SUMMIT databases).

Proven Solution

Credit Unions have been using the IMS since 2000. PSI has built many solutions (both Intranet and Internet). Why not see what PSI can do for you?

SUMMIT is a registered trademark of SUMMIT Information Systems. SOLV is a trademark of SUMMIT Information Systems.

XML MIDDLEWARE SERVER

Features

The Performance Systems International XML Middleware Server has a robust set of features, including:

- Loan Applications
- New Member Accounts
- New Savings/Checking
- New Certificates
- New Plastic Cards
